Inspired by the care you deliver

Hospital Wish List

We enjoys partnerships with manufacturers from around the world. This brochure represents only a small portion of the available products. Please consult your local Stevens Representative for help finding the supplies and equipment you need.

The new HEINE visionPRO video laryngoscope.

Clinicians have put their trust in Heine's classic + laryngoscope products for quality, durability and safety, now is the time to instill a whole new level of the same trust in their new visionPRO video laryngoscope.

1. Bright and sharp image

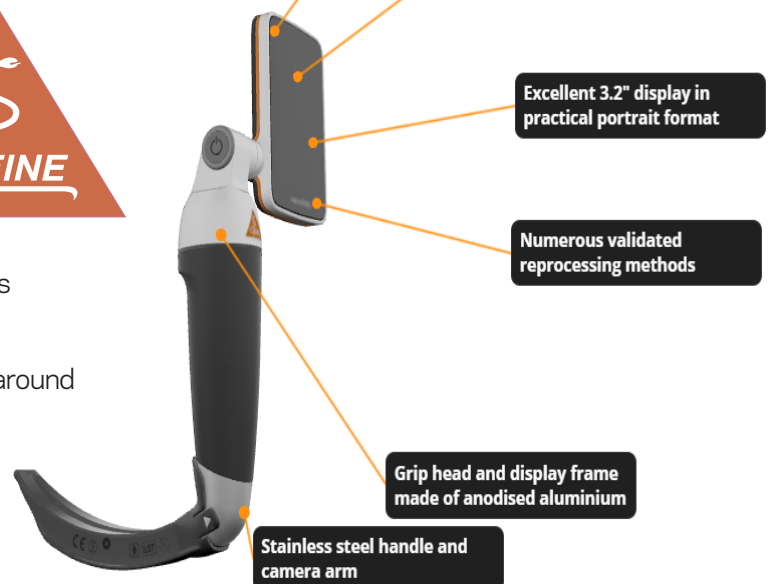

Unique worldwide: HEINE transfective allBRIGHT display adapts to even the brightest ambient light

2. Robust and smart product design

Extremely durable and long-lasting:
Accurate and intuitive operation - even in time-critical situations

3. Ecological and economical

Blade made from upcycled material: We save the environment around 200 metric tons of CO2 per year already in the very first year.

RS120A Rotosealer

- Offers practical means for monitoring of sealing parameters
- Temperature is adjustable from 100°C to 200°C—with a tight tolerance of $\pm 1\%$ only—and its control is in conformance to DIN 58953-7
- Default setting for the sealing pressure is at 100N $\pm 5\%$, but depends on the thickness of the material to be sealed. The upper limit is adjustable
- The display shows a warning and a sound alarms upon incorrect values

#164-RS120AV

Steriking® Roll Holder w/Cutting Device

- Intended for cutting the desired length of sterilization rolls
- Self-sharpening knife made from hardened steel enables maintenance free use for years
- Two steel rods equipped with nylon bearings makes unrolling of reels easy
- Available in two widths
- Roll Holders are table models that can also be attached to the wall

HEINE® Classic+ Macintosh and Miller Fiber Optic Blades

Choose HEINE blades for 10 years of maintenance-free service.

- New 10 year warranty
- smoothSURFACE - easy to clean and safe for patients
- 1 piece, chrome plated stainless steel for added durability

Multicare X & Opticare X ICU Bed

- LINET's premium ICU bed Multicare X with unique frame-based lateral tilt. Accompanied by Opticare X, innovative constant low pressure supporting surface.
- Frame-based lateral tilt allows easier patient manipulation and minimizes back pain.
- 30% lighter bed frame and motorized 5th castor for easier transportation.
- Nurse-friendly interface of the bed makes frequent and critical nursing tasks simpler. 10" Multiboard X display is easy to use and CPR features will provide aid in critical situations.
- Our Smart Care solutions, such as SafetyPort and SafeSense, reduce administrative tasks and make the hospital operations more efficient.

Sprint 200 Stretcher

- I-Drive Power® reduces the driving forces to a push of a button.
- IV&Drive® combines push handles and IV poles into one.
- Safety Sense stops the stretcher when the hand is removed.
- Zerogap Siderails with SoftDrop function made from durable plastic.
- Mobi-Lift® Handle provides support during bed exit.
- Scales with precision of 0.5kg and bed exit feature.
- Easybrake® accessible from all four sides.
- Ergoframe® reduces pressure in pelvic area and sliding down forces.
- Angle indicators on siderails and backrest help with positioning.

AVE 2 Birthing Bed

- Easy transport
- Slick column design and removable mattress allow for easy cleaning.
- The bed design ensures safety of the mother while being on the bed and during labour.
- Ergonomic design makes it possible to operate the birthing bed with one hand.
- Upright childbirth support – mother is empowered to choose her preferred position for her birth and change it quickly if needed.

Pura Multifunctional Chair

- Fully equipped chair option for day surgery recovery or diagnostic procedures.
- Treatment option that is comfortable for dialysis, oncology treatment or blood donation.
- Easy patient transport.
- The comfort of the patient is ensured during long-term procedures by ergonomical frame and soft padding.
- Unique siderails ensures patient safety while Soft Drop mechanism enables for smooth & easy lowering of siderails and easy access to patient.

Weighing and Measurement Solutions

SR555i Digital Floor Scale

- Portable—take the scale to the patient for an ideal point-of-use scale. Just Tip'n'Go
- Memory Recall—the last stored weight
- BMI Calculation—enter height information to calculate and display Body Mass Index

#138-SR555i

Health-o-Meter® 500KL Eye Level Digital Scale

- Capacity: 500lb (220kg)
- Resolution: 0.2lb (0.1kg)
- EMR connectivity via USB
- 1" LCD display
- Functions: lb / kg conversion, lb / kg lockout, body mass index (BMI), zero out / tare, hold / release, reweigh, auto zero, auto off

#130-500KL

Seca® 264 Wireless Stadiometer

- Measuring range: 11"-7ft. 2" (30cm-220cm)
- Graduation Length: 1/8" (1mm)
- Weight: 11lb / 5kg
- Functions: EMR capable, calibration / automatic calibration, send/auto-send, print/auto-print, reset, acoustic signals can be activated, user defined zero setting, cm/inch switch-over, hold, automatic switch-off

#244-2641900009

Health-o-Meter® 2600KL Digital Wheelchair Scale

- Capacity: 1000lb (454kg)
- Resolution: 0.2lb (0.1kg)
- Functions: lb / kg conversion, lb / kg lockout, body mass index (BMI), zero out / tare, hold / release, reweigh, auto zero, auto off

#130-2600KL

Seca® 210 Mobile Measuring Mat for Babies and Toddlers

- Capacity: 44lb (20kg)
- Measuring range: 4"-39" (10cm-99cm)
- User defined zero setting, cm/inch switch-over, hold, automatic switch-off

#244-2101821004

Seca® 212 Measuring Tape for Head Circumference of Babies and Toddlers

- Measuring range: 2"-23" (5cm-59cm)
- Non-stretch Teflon synthetic material

#244-2121817009

Health-o-Meter® 2595KL Digital Chair Scale

- Capacity: 600lb (272kg)
- Resolution: 0.2lb (0.1kg)
- Functions: lb / kg conversion, lb / kg lockout, zero out / tare, auto off

#130-2595KL

Seca® 813 High Capacity Electronic Flat Scale

- Capacity: 440lb (200kg)
- Functions: kg/lbs switch-over, auto-hold, automatic switch-off, tap-on function, step off

#244-8131321009

Health o meter[®]

Professional

Heavy-Duty Antimicrobial Platform Scale

This heavy-duty platform scale supports up to 1000 pounds (454 kilograms) and provides the optimum in quality, reliability, and ease of use. The scale can interface with a computer, EMR software, or other electronic devices via various Health o meter[®] Professional Connectivity Solutions

Safety Features Include:

- Low-profile platform
- "Live" handlebars
- Antimicrobial protection – head, keypad transport handle, handrails, body, and kickplate
- Innovative design that eliminates places for dirt and contaminants

Quick Calibration

One-step calibration process in LB or KG

On-Screen Help Menu

Guides users through operating functions and provides easy access to multiple settings

Everlock[®]

An option that allows users to permanently lock the scale in either LB or KG to improve safety

#130-3105KL-AM Platform Scale
#130-245EHR-3105 Optional Height Rod

Antimicrobial High-Resolution Digital Neonatal/Pediatric Tray Scale

The 2210KL-AM-C neonatal scale was designed for use in the NICU, nursery, delivery room, and pediatric practices, where a high degree of accuracy is critical to the smallest of patients. The scale gives providers and patients safety with an Antimicrobial body, tray, handles, and keypad.

Antimicrobial

Antimicrobial body, tray, handles, and keypad

1 Gram Resolution

The high 1 gram resolution scale features a capacity of 20,000 grams/20 kg/45lb.

Removable Tray

The smooth-edged removable tray has a patent-pending mounting system that eliminates breakage, making it easy to clean.

Built-in Measuring Tape

The built-in measuring tape allows users to measure both weight and height simultaneously.

Motion Detection

The scale's motion detection gives it the ability to weigh accurately despite the movement of the patient.

Everlock[®]

Allows the measuring units (LB, KG, or G) to be permanently locked on the scale.

#130-2210KL-AM-C Scale

MESI mTablet System

Completely New Concept of a Medical Device

The MESI mTABLET system helps clinicians provide their patients with the best medical assessment by combining diagnostic measurements, patient records and clinical support tools in one modular and user-friendly system.

All measurement reports and patient data are automatically stored in the patient record. The information can be reviewed on a computer, through the practice's information system or on the built-in MESI mRECORDS platform, providing secure access from any web-enabled device.

Performance and functionality can be enhanced with numerous extensions available in the medical marketplace — MESI mSTORE.

All in One System

Wireless and portable system provides boundless freedom in a modern healthcare facility. The modular system allows you to add diagnostic measurements with modules and apps according to your practice's needs. New ones can be added to the system whenever necessary.

Why MESI mTABLET ABI?

- SmartArm™ detection - to determine the higher blood pressure of the two
- Automated, 3-cuff simultaneous measurement
- Multiple cuff sizes and ability to mix-and-match different size cuffs during one measurement
- Pulse waveforms and oscillation graphs
- Advanced review and alerts, thanks to PADsense™ algorithm

Why MESI mTABLET TBI?

- Safe, simultaneous measurements in both arms and big toes, with adaptive, infrared LED PPG light, detecting toe skin temperature and thickness
- FirstWave™ algorithm for detecting the first returning pulse waveform in the toes
- Comprehensive and reliable TBI report with pulse waveforms and oscillation graphs for the arms and PPG pulse waveforms for the toes
- Single-use (disposable) toe cuffs available

reddot design award
winner 2018

Other diagnostic modules available include: ECG, SPIRO, BP, and SPO2, as well as a wide array of application extensions on the mTABLET

Wherever Your Work Takes You, the MESI mTABLET System Follows

There is no need to change the way you go about your daily tasks: the MESI mTABLET system adapts to your particular healthcare setting. Whether you are a part of a [smaller practice](#), a walk-in clinic, a [multi-level hospital](#) environment, or you provide the patients with [home care visits](#): the MESI mTABLET can be used anywhere, without limitations. It supports you throughout your day and helps you [work smarter, not harder](#).

In Hospital

Keep all your team members in the loop through working groups and ensure the same level of care for all your patients by building custom protocols. All diagnostic procedures are fast and objective, and all reports are automatically stored in the patient records. The unified user experience for every single measurement helps strengthen, not only your relationships with your patients, but also your coworkers.

In the Healthcare Practice

Configure your system according to your needs and set it up with little training. You can have a complete overview of all the measurements in real time or at any point during your day, accessible on any web-enabled device. Need a second opinion? The MESI mTABLET's share button ensures the consulting specialist receives the full report without any sensitive patient information.

During Home Visits

Pack the MESI mTABLET and the modules into your bag and carry it with you — the battery will last all day. Perform the necessary measurements, take photos of skin conditions to monitor the healing progress and add relevant comments. Share the reports for a second opinion or review them on the built-in MESI mRECORDS platform.

Medical Carts and Storage Solutions

The Harloff Company—Offering a wide selection of medication, clinical and health care carts.

- Emergency Carts
- Anaesthesia Carts
- Isolation Carts
- Procedure Carts
- MRI Safe Carts
- Cast Carts
- Medication Carts

Metro Wire® allows you to maximize space with a wide variety of storage solutions. With no screws or bolts, assembly is a breeze.

- Stationary, mobile or wall mounted units are available
- Customize your own unit!
- Available for dry and wet environments

Imperial Surgical Blanket Warming Cabinets

#100-OR-7154

#100-OR-7754

- Cabinets are designed to ensure maximum storage
- All cabinet bodies and interior components are fully welded stainless steel
- Insulated with R-6 rating
- SUPERIOR AIR CIRCULATION (HEPA Filtered)
- Available in single and double compartment sizes

Mac Medical Blanket & Fluid Warming Cabinets

D-Series, the most user-friendly temperature recording devices on the market today are equipped with independent, digitally controlled heating chambers that offer actual temperature and set point displays. Simple plug and play data download requires no additional software. With its sleek new appearance, the D-Series warmers are sure to enhance your facility.

- "Easy Log" integrated data logger with removable USB—now standard!
- Keyed door lock for single & upper chamber units—now standard!
- Adjustable feet—now standard!
- Automatically records data every 30 minutes
- Internal storage up to 2 years
- Displays actual temperature and set points at all times
- Independent digitally controlled heating chambers
- Rapid warm time (2-6 hours depending on load)
- Keyed temperature lock out
- Push button digital operation
- Large dual digital displays
- Fully insulated to provide uniform heating
- Audible & visual over-temp alarm
